

Vernon Kramer

Vernon holds a B.S. in Mining Engineering from Texas Western College and an M.S. in Geology from the University of Texas at El Paso. His work in mining and exploration spans 30 years and his work experience extends from the underground miner with dynamite and a pick in hand to managing international exploration offices that oversee multiple million dollar projects. He has conducted multi-national exploration in Asia, including Afghanistan, Korea, Thailand, and Indonesia, as well as in both North and South America, for metallic and non-metallic commodities such as limestone, gold, oil and gas, copper, and uranium, to name a few. Coming full circle, he now works to motivate and educate the next generation of scientists and engineers, as a professor of Geology at Del Mar College in Corpus Christi, Texas.
