

Summary & Activity:**There to Stay, Making Mars Like Home - Crew Selection & Group Dynamics****Summary**

Sheryl Bishop, Ph.D. a social psychologist, shares her experiences with crew selection and psychological factors research, and how this relates to the future settlement of Mars. She goes on to explain that in order for the settlers to be “happy and healthy” there are several factors that should be considered. These factors are explored in the video and include habitat design, privacy and personal space, leisure activities, and food. The activities below are also proposed to the students.

Video Run Time: 11 minutes, 20 seconds
